New Products Committee - Product No. 0016 – Silt -Saver Frame and Filter Assembly

Mr. Joey Dobbs – President
Silt-Saver, Inc.
1401 Business Center Drive
Conyer, GA 30094

Dear Mr. Dobbs:

The New Products Committee met on December 14, 2000, and your above referenced product was presented for the Committee's consideration. Following a review of your submittal and a field evaluation on U. S. Rte. 29, Spartanburg, the Committee assigned this product a classification of "A" or Accepted. The Silt-Saver Frame and Filter Assembly will be allowed as an alternate to our Inlet Structure Filter (Type A or B) shown in the Department's Standard Drawings (815- 4) when those items are specified in the roadway construction plans.

Acceptance of a product does not obligate the Department to include or specify the product for use on a project. It will be up to you and your company to market this product to those in the Department who can specify its use. If you have any questions concerning the above, please let me know.

Sincerely,

A handwritten signature in black ink, appearing to read "E. S. Eargle".

E. S. Eargle
Road Design Engineer
